

## DermaSyn™ Hydrogel Wound Dressing

DermaSyn™ is an amorphous hydrogel dressing with vitamin E that donates moisture to help provide an optimal wound healing environment. Needs a secondary dressing.

### Benefits:

- Facilitates moist wound healing
- Supports autolytic debridement
- Latex free

### Indications:

A primary dressing that may be used for the management of acute or chronic partial and full thickness wounds/ulcers that are dry or have minimal exudate.
