

ComfortFoam™ Border

Self-Adherent Soft Silicone Foam Dressing with Border

ComfortFoam Border is a self-adherent silicone foam island dressing consisting of a soft silicone contact layer, a flexible, absorbent polyurethane foam pad and a vapor-permeable, moisture-proof outer film. The silicone adhesive sticks to surrounding skin but not to the wound bed, minimizing pain and the risk of damage to the wound area.

Benefits:

- Silicone adhesive is gentle to both wound bed and skin for safe, easy removal
- Low profile border for added adhesion and flexibility
- Absorbs exudate while minimizing the risk of maceration
- Border is showerproof and prevents exudate leakage
- Supports moist wound healing
- Provides thermal insulation and protection
- Can be safely worn for several days, depending on wound condition and exudate levels
- Latex free

Indications:

For the management of partial and full thickness wounds, including:

- Pressure ulcers
- Arterial ulcers
- Traumatic wounds
- Diabetic ulcers
- Venous ulcers
