- For Stage III and Stage IV Ulcers

Take Patient Healing To The Next Level

ProHeal™ Critical Care Liquid Protein Supplement is a concentrated blend of hydrolyzed collagen and whey protein, for maximum protein content and absorption. ProHeal Critical Care also includes Vitamin C and L-Arginine for collagen synthesis and increased blood flow to wound areas, as well as Zinc and Copper, co-factors in connective tissue reproduction.

ProHeal™ Critical Care is a medical food developed for the dietary management of wounds, pressure ulcers, and other conditions that would benefit from increased protein intake such as hypoalbuminemia, involuntary weight loss, anorexia, protein calorie malnutrition, muscle wasting conditions (cancer, AIDS), dialysis and bariatric surgery.

Dosage: Dosage should be determined by a medical professional based on individual's condition and nutritional needs. 2 tablespoons provide 17 grams of protein, or about 34% of suggested daily value.
