

Support Urinary Tract Health

UTI Heal is a medical food designed to create an 'unfriendly' environment that helps displace *E. coli* and other organisms from the urinary tract. The concentrated cranberry-based formula contains Vitamin C, D-Mannose, Erythritol and FOS (inulin) for a healthier urinary tract system. Use under medical supervision.

Dosage:

Primary/Recurring UTI* - 1 fl. oz, 2 times daily for 4 weeks.

Prevention - 1 fl. oz, 1 time daily (catheter users - 1 fl. oz, 2 times daily).

Product	Size	Reorder #	Units	HCPCS

UTIHeal	1 oz	PRO6000U	96/Case	B4104

UTIHEAL®

LIQUID CRANBERRY NUTRITION FOR URINARY TRACT HEALTH

- Great taste and ready to serve
- Helps prevent antibiotic resistance
- 1 ounce dose
- Liquid formulation has better absorption than tablets
- No known drug/food interactions
- Low glycemic index - does not increase blood sugars
- Thin liquid consistency
- Soy, lactose and gluten free
- May be administered orally or via feeding tube

Special Formulation

Cranberry Concentrate - Clinical studies have shown that PAC (*ProAnthoCyanidins*) found in cranberries exhibit potent bacterial anti-adhesion properties.

D-Mannose & Erythritol are natural sugars which help displace bacteria as they pass through the urinary tract and bladder. These sugars do not interfere with blood glucose levels.

Vitamin C helps lower the body's natural acidity (pH) creating a less tolerable environment for bacterial growth.

FOS (Inulin) stimulates the growth of beneficial bacteria naturally found in the digestive system, reducing the number of harmful bacteria that can lead to infections.
