## XeroForm Gauze Dressing

Gauze Dressing impregnated with Xeroform & Petrolatum

Xeroform Gauze Dressing is a fine mesh gauze occlusive dressing impregnated with petrolatum and 3% Xeroform (Bismuth Tribromophenate). Non-adherent. Clings and conforms to all body contours. Sterile. Latex free.

### Indications:

For use as a primary dressing on low to non-exudating wounds, including:

- donor sites
- lacerations
- burns
- abrasions
- skin graft sites
