ComfortFoam/Ag™

Foam Wound Dressing with Soft Silicone Adhesive and Silver

ComfortFoam/Ag is a self-adherent silicone foam dressing with silver, a vapor permeable waterproof backing, and a soft silicone wound contact surface. ComfortFoam/Ag absorbs exudate, maintains a moist wound healing environment and has good antibacterial preservative properties. ComfortFoam/Ag foam dressing consists of 0.25~0.35mg/cm² of silver ions that demonstrate in vitro antibacterial preservative effectiveness within the dressing for up to 7 days. The silicone adhesive sticks to surrounding skin but not to the wound bed, minimizing pain and the risk of damage to the wound area.

Benefits:

- Silicone adhesive is gentle to both wound bed and skin for safe, easy removal
- May be cut to fit wound site
- Absorbs exudate while minimizing the risk of maceration
- Supports moist wound healing
- Can be safely worn for several days, depending on wound condition and exudate levels
- Silver helps to reduce bacterial colonization in the dressing

Indications:

For the management of exuding wounds, including:

- Leg and foot ulcers
- Traumatic and surgical wounds
- Superficial and partial thickness burns.
- Pressure ulcers

Not made with natural rubber latex.
