

Lantiseptic, the experts in lanolin-based skin care for over 20 years.

WHY LANOLIN?

- Lanolin is a natural fat-like ingredient sourced from wool that mimics the lipids in our skin and helps prevent water loss through the skin
- Lanolin forms a thin barrier film which protects skin from outside irritants that can damage or weaken skin
- Lanolin smooths and lubricates dry skin by promoting proper moisture balance in the skin
- Lanolin has been used for thousands of years and is a common ingredient in many cosmetics, lotions, and barrier protectants

Lantiseptic® Original Skin Protectant
