

DermaPrep™ Liquid Barrier Skin Prep

DermaPrep™ Liquid Barrier Skin Prep is a long-lasting waterproof barrier that forms a film designed to shield peri-wound skin from bodily fluids, adhesives, and frictional forces. It helps reduce pain and the risk of damaging the skin during tape and adhesive removal.

Benefits:

- Applies and removes easily
- Improves dressing adhesion
- Reduces the risk of skin trauma during tape and adhesive removal

Indications:

- To protect against excessive moisture due to wound exudate, tube drainage or incontinence.
- To prevent skin stripping from adhesives.
- To decrease friction damage over bony prominences.
- To form an extra barrier over intact skin in fragile areas as seen with Stage 1 pressure ulcers, suspected Deep Tissue Injury and blood blisters.
