

NOW AVAILABLE: 4" Round Fenestrated with Radial Slit

Bordered Foam is now available as a 4" (2" pad) round dressing that is fenestrated with a radial slit for easy and convenient application to surgical wound tube sites.

Bordered Foam™ Waterproof Bordered Foam Dressing

Bordered Foam is an absorbent primary hydrophilic foam dressing with an adhesive, waterproof, composite secondary layer.

Benefits:

- Absorbs up to 20x its weight in fluids
- Mild compression and absorption to manage hypergranulation
- Hydrophilic foam’s wicking ability decreases maceration
- Protects & cushions wound
- Waterproof composite secondary layer keeps dressing in place and prevents contamination
- Conforms easily to awkward-to-dress areas
- Latex free

Indications:

- For the management of exudating partial and full thickness wounds.
- **Bordered Foam Round Fenestrated is indicated for partial and full thickness wounds at peritubular surgical wound sites, peritubular hypergranulation.**
