

DermaDress™ Waterproof Composite Dressing

DermaDress™ is a multi-layered waterproof composite dressing. Its low adherent pad absorbs exudate and protects the wound. A waterproof non-woven adhesive tape holds the dressing in place and provides a bacterial barrier.

Benefits:

- Self-adherent
- Flexible and conformable
- Bacterial and fluid barrier
- Non-linting
- One piece removal
- Compatible with topicals
- Latex free

Indications:

Used for the management of acute or chronic partial- and full-thickness wounds/ulcers with minimal to heavy drainage.
