

FlexPress⁴[™] 4 Layer Compression Bandage System

FlexPress 4, from DermaRite's DermaPress Compression Systems line, is a complete bandage kit consisting of 4 compression wraps and adhesive strips for securing the dressings. FlexPress 4 may be worn for up to 7 days, providing effective graduated compression for the management of edema related to venous leg ulcers and other associated conditions for individuals with appropriate arterial circulation and ankle circumference. Latex free.

Includes:

- Layer 1 - Padding Bandage (4" x 3.8yds.) - Soft and absorbent. Protects bony prominences from excessive pressure.
- Layer 2 - Conforming Bandage (4" x 4.9yds.) - Elastic and highly conformable. Provides additional absorption.
- Layer 3 - Compression Bandage (4" x 9.5yds.) - Provides gentle compression.
- Layer 4 - Cohesive Bandage (4" x 6.5yds.) - Provides additional compression while holding the layers securely in place.

Benefits:

- Graduated compression of lower leg aids venous blood return
- Absorbent for exudate management
- All-in-one kit to expedite dressing changes
- May be safely worn for up to 7 days
- Latex free

Indications:

Therapeutic compression for the management of venous leg ulcers and associated conditions.
