

**NEW!**

## ComfiTape™ Silicone Adhesive Tape

ComfiTape™ is a flexible, waterproof, non-woven tape with a unique silicone adhesive that sticks securely to intact skin but not to moist wounds. Tan colored tape blends in with skin to preserve patient dignity. Non-sterile. Not made with natural rubber latex.

### Benefits:

- Adheres gently and securely to intact skin
- Easy to tear to the right size
- Won't stick to wound bed
- Easy removal

### Indications:

Use to secure wound dressings, catheters, and other medical devices.

Product	Size	Reorder #	Units
