

## FlexPress<sup>2</sup>™ 2 Layer Compression Bandage System

FlexPress 2, from DermaRite's DermaPress Compression Systems line, is a complete bandage kit consisting of 1 cohesive comfort compression bandage and 1 cohesive compression bandage. FlexPress 2 may be worn for up to 7 days, providing effective graduated compression for the management of edema related to venous leg ulcers and associated conditions with appropriate arterial circulation and ankle circumference.

**Includes:**

- Layer 1 - Cohesive Comfort Compression Bandage 4in. x 7.1yds. (10cm x 6.5m)
- Layer 2 - Cohesive Compression Bandage 4in. x 8.9yds. (10cm x 8.2m) stretched

**Benefits:**

- Graduated compression of lower leg aids venous blood return
- Absorbent for exudate management
- All-in-one kit to expedite dressing changes
- May be safely worn for up to 7 days

**Indications:**

For the management of edema related to venous leg ulcers and associated conditions.

Not made with natural rubber latex.
